

BATH TOWEL COLLECTION

(2020-2021)

MicrobeSafe

Any towel in our portfolio can be treated with our trademarked antimicrobial technology. MicrobeSafe™ silver antimicrobial technology offers superior performance over the competition. Using SILVADUR's patented technology delivers silver ions to fabric surfaces and activates them in the presence of undesirable bacteria. MicrobeSafe™ uses the world's most advanced intelligent control mechanism to deliver this technology. During testing, after rigorous launderings, MicrobeSafe™ still had a 99% antimicrobial control rate against bacteria and fungi.

The **MicrobeSafe™** antimicrobial treatment technology penetrates the towel's fibers to minimize odors and odor causing bacteria to provide an unmatched, **long-lasting sense of freshness**. This enhanced freshness means fewer washings are required which benefits our customer and the environment.
